**Report on
World Environment Day 2023**

Date: June 5, 2023

Event: Tree Plantation Drive

Organized by: NSS Unit, N.S.Mahavidyalaya

Location: College Campus.

Total Participants: 45 NSS volunteers and other students of college.

The world environment day is celebrated every year on 5th June to raise global awareness about the environment and encourage actions to safeguard our planet. The NSS Unit of Netaji Subhash Mahavidyalaya celebrated World Environment Day with a tree plantation drive on June 5, 2023, within the college campus, underlining the importance of greenery and environmental conservation. The event was well-participated by both students and faculty members. The day's activities included the planting of 50 saplings across various locations on campus, with 45 NSS volunteers, Teachers, Principal, and the NSS Program Officer (PO) actively involved.

The tree plantation drive was not only a symbolic gesture but also a practical contribution to increasing the green cover on the college grounds, thus improving the overall ecosystem. Various types of saplings, ranging from medicinal plants to small trees that support local wildlife, were planted. Each sapling was carefully planted with the help of volunteers, ensuring that proper planting techniques were followed to ensure growth and sustainability. After the plantation, the volunteers were reminded of their responsibility in maintaining the saplings. Volunteers were educated about the aftercare of the plants, including the importance of watering and regular maintenance. A group of volunteers was assigned to oversee the maintenance and care of the plants. This follow-up activity aimed to ensure that the saplings continue to grow and thrive, eventually becoming an integral part of the college's green ecosystem.

The World Environment Day 2023 celebration at Netaji Subhash Mahavidyalaya was a significant event that successfully brought together students, faculty, and the administration in a unified effort to contribute positively to the environment. The tree plantation drive not only helped beautify the college campuses but also played a crucial role in promoting environmental sustainability. By planting 50 saplings and raising awareness about climate change and environmental responsibility, the event emphasized the importance of collective action in addressing the environmental challenges of our time. It also provided an opportunity for the NSS volunteers and others to directly engage with the environment, fostering a sense of ownership and responsibility toward the planet.
